CLEAN AIR

AIRFORCE V1 FRESH AIR SET

AIRFORCE V1 FRESH AIR SET

The AirFORCE V1 Fresh Air Set consists of a welding helmet and a fresh air system.

The set protects the welder from harmful welding rays and fumes, making the inhaled air 50 times cleaner than the air in the immediate area.

TH2 APPROVED

COMFORTABLE TO WEAR

UNIQUE DESIGN

SUITABLE FOR GRINDING & CUTTING

EASY TO CLEAN HEAD CUP

The AirForce V1 Fresh Air System connects to the Force 800 welding helmet with an air hose.

FILTER REPLACEMENT

The main filter can be compared to an air filter in a car, when polluted it has to be replaced. The unit gives an alarm through vibration, a beeping sound, and a flashing warning light. The degree of saturation of the main filter will not affect the airflow. The main filter is protected on the outside by a spark trap and a pre-filter.

820S & 830S AUTO-DARKENING WELDING FILTERS

With a choice of two auto-darkening welding filters, type 820S or 830S, the Force 800 welding helmets give your eyes optimal protection against harmful UV radiation.

Both filters have 4 sensors. The 820S welding filter is equipped with an extra large viewing window, for the ultimate working comfort. The lens with the highest optical glass provides clear view of the work area.

ALL DAY COMFORT

The lightweight AirForce Fresh Air System is worn with a belt around the waist.

The weight is distributed by a wide belt, lined with a shock absorbing material for comfort.

LASTING BATTERY

A rechargeable battery provides the power to the fan motor. Depending on the contamination of the filter, the battery lasts 9 hours.

An acoustic sound provides a warning signal when the voltage of the battery is too low. A separate charging station is supplied with the AirForce Fresh Air System.
