Hands-free door opening.

Hands-free Door Opening with DoorPedL™

Prevent the spread of infection with DoorPedL™

Your hygienic handle solution

01 Hygienic and Safe - eliminate germ and virus transmission using DoorPedL™ to open doors with your foot.

02 Easy to install – quick and simple to fit. No specialist skills required.

03 Fits a variety of doors – available for latched and unlatched doors.

04 Get people back to work sooner - by making the workplace safer.

05 Available in any finish - match your existing ironmongery with a wide range of finishes.

Hands-free door opening.

/ DP01 DoorPedL™ Unlatched Doors

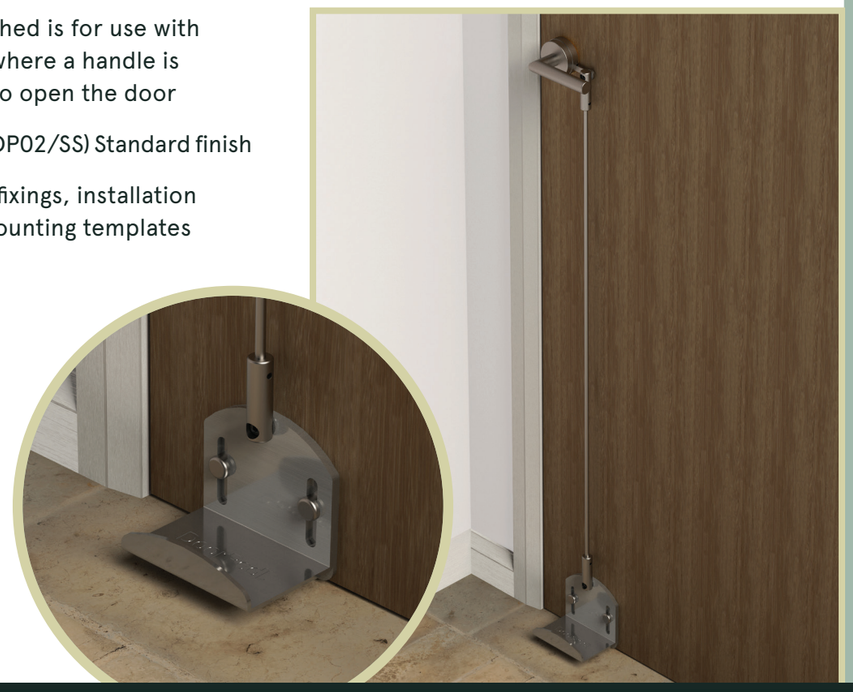
- DoorPedL™ is for use with unlatched doors that are typically controlled with a door closer
- **Standard finishes include:**
  - Stainless steel (DP01/SS)
  - RAL 9016 White (DP01/W)
  - RAL 9005 Black (DP01/B)
- Manufactured using 3mm folded steel for extra strength and durability
- Complete with fixings, installation instructions, mounting templates and signage.

Transmission of germs by hand-to-surface contact is a very real concern at any time but none more so than now. DoorPedL™ is your innovative solution to stop the spread of infection by eliminating contact with a door handle.

The DoorPedL™ is easily fitted to existing doors to enable latched and unlatched doors to be opened using only a foot. Fitted to both sides of the door, the DoorPedL™ can be used to push and pull the door open and closed.

/ DP02 DoorPedL™ Latched Doors

- DoorPedL™ Latched is for use with latched doors where a handle is normally used to open the door
- Stainless steel (DP02/SS) Standard finish
- Complete with fixings, installation instructions, mounting templates and signage.



Don’t handle it, PedL it!

DoorPedL™ can be installed onto latched and unlatched doors in any buildings where people work, learn and play. DoorPedL™ provides a high level of protection from virus transmission through it’s foot pedal mechanism.

Offices

Fitting DoorPedL™ to office doors, helps eliminate hand contact with doors, therefore protecting employees from potential virus transmissions.

Education

DoorPedL™ reduces infection transferal substantially, and it can be easily fitted by maintenance teams, making it the perfect product for Schools, Colleges, Universities and student accommodation.

Healthcare

Whilst many healthcare establishments use automatic doors, conventional latched and unlatched doors are prevalent in hospitals and care homes. DoorPedL™ provides protection against Covid-19, and other infections, common in healthcare establishments.

Leisure

Restaurants, public houses, gyms and other leisure establishments need to protect their customers and staff now more than ever, especially in places where food or drink is consumed. By installing DoorPedL™, employers are providing safer environments.
